

## *Circuit Car Newsletter No.03*

*December 2006*

Dear All

The Lotus Sport Circuit Car programme has been progressing quietly here over the past few months and we have now released initial details of the launch edition specification and price to UK dealers so that they can start to take provisional orders.

The car will initially be available in two versions: a UK Single Vehicle Approval variant which can be driven on UK roads legally or a track only version which features higher downforce aerodynamics and track focused equipment, such as an FIA approved race seat and 6-point harness.

Both cars come with the same powertrain: a 255PS variant of the supercharged Exige engine and 6-speed Toyota transmission with limited slip differential.

With the track car kerb weight being just 680kg, the car offers a power to weight ratio of 375 PS/tonne and performance to match.

Should you wish to request further information on the Circuit Car or any of the products in our line-up, please contact your nearest UK dealer. The Lotus Cars website features a dealer locator, which can be found at [http://www.grouplotus.com/car/car\\_dealerloc.php](http://www.grouplotus.com/car/car_dealerloc.php)

Alternatively, if you have any specific questions concerning the vehicle, please feel free to contact me direct at <mailto:circuitcar@lotuscars.co.uk>

Thank you again for your interest in Lotus Cars and the Lotus Sport Circuit Car project.

Best Regards

Nick Adams, Lotus Sport Vehicle Development Manager
